STONE RURAL DISTRICT COUNCIL.

ANNUAL REPORT

OFTHE

MEDICAL OFFICER OF HEALTH.

To the Chairman and Members of The Stone Rural District Council.

The state of the s

I beg to submit to you my report for the year 1940.

to the first factorial of the first manager of the first The normal work and activities of Public Health have been considerably curtailed in your District chiefly owing to the fact that your Staff has been considerably reduced and those members remaining are engaged on War activities, A.R.P., Salvage etc., which has left only time to carry out the most essential work to maintain the health of the population.

The fact also that I am acting as a part time Officer and have a considerable increase in my private practice has made it difficult to keep in touch with the various duties requiring my attention. Fortunately I have been very ably assisted by your Staff, Mr. Gaskin, Mr. Hawkes the Sanitary Inspector, Mr. Holmes until he joined H.M. Forces, and Mr. Bevan now in the Sanitary Inspector's Office. They have shewn me every kindness and consideration.

I have the honour to be, Lady and Gentlemen,

Your obedient Servant.

R. Murray Barrow.

Medical Officer of Health.

A.R.P. ORGANIZATION.

The arrangements for First Aid for injured, sustained in enemy air raids in the Stone Rural District, are on the whole good. Also owing to local efforts the standards of equipment and efficiency have developed far beyond the requirements laid down by the Ministry of Health.

Eccleshall which is the most populous parish in the district has a very efficient "Post" manned by keen workers under the care of Dr. Glynne Owen.

Mr. Carter at the castle has kindly set apart a suite of rooms fitted up for the reception of severe cases.

Trentham, which borders on the two areas of The Stone Rural District and Stoke-on-Trent, after a period of inactivity is now supplied with a complete mobile unit which Dr. Yates is in charge of. This is manned day and night.

Barlaston has a very good post, manned by a Red Cross detachment under the leadership of Miss Bullock. (Since this report was completed Miss Bullock has been appointed Commandant of the Sandon Hall Convalescent Hospital.)

Blythe Bridge is similarly well staffed, although the premises at the Tennis Club Pavilion are not suitable. Efforts have been made to find a more solid and protected quarter without success. The First Aid workers are very enthusiastic, led by Miss Astbury.

Meir Heath has good premises at the Warden's Post and under ex Petty Officer Titterton R.N. maintain a high standard of 1st Aid efficiency with regular weekly practices.

Hilderstone is somewhat of a disappointment. Although a course of Red Cross lectures have been given in the winter the initial enthusiasm waned and regular practices are not held.

Swynnerton is provided with good premises by Lord Stafford and its equipment is satisfactory. Practices are not held. regularly.

Sandon also, though favoured with a commodious and convenient building in the Village Hall lacks leadership and organization in the personnel. No practices are held.

AIR RAID SHELTERS.

As regards Air Raid Shelters, the policy of the Ministry of Home Security has changed from individual to Communal This is probably due to a shortage of materials. It has naturally delayed the work and provision of shelter accommodation.

In December the Council appointed Mn. R. E. Wood, Architect of Hanley to arrange for the provision of Air Raid Shelters in the District.

---000----

INFECTIOUS DISEASE.

The remarkable and widespread epidemic of Measles has been the outstanding feature of the notifiable disease during the past year. The number of fatal cases have not been out of the way, but several schools have closed down. Apart from the Measles epidemic the health of the community has been good.

The work of inspection of school children in your schools has had to be transferred temporarily to the Lady Medical Officer attached to the Standon Hall Orthopaedic Hospital under the County Education Authority.

The immunising of school children with Anti-Diphtheria Serum has been carried out regularly and methodically with a high percentage of acceptances in the schools, as the figures given below, show. Besides the children of school age, many parents have brought their younger children to the school for immunization.

The following figures cover the period from June 1940 to March 1941.
